

Four Hospital Pathways Linking Opioid Use Disorder (OUD) Patients To Treatments & Medications

Jess Davis

Mentor: **Fran Barg, PhD, MEd**

Setting: **Mixed Methods Research Lab (MMRL)**

Study PI: **Austin Kilaru, MD**

Roadmap

OVERVIEW > POLICY > PROJECT > EXPERIENCES

PROJECT OVERVIEW

Opioid
Use
Disorde

PATHWAY 1

PATHWAY 2

PATHWAY 3

PATHWAY 4

Overview. Use mixed methods to evaluate the implementation of a statewide health policy specifically designed to target the opioid epidemic in PA.

health policy

HQIP

HQIP

Hospital Quality Incentive Program

HQIP SUMMARY

a recent **policy response** to
PA's opioid crisis.

provides financial
incentives for hospitals to
implement 4 specific
pathways...

Opioid
Use
Disorde

- PATHWAY 1
- PATHWAY 2
- PATHWAY 3
- PATHWAY 4

...4 specific pathways
that transition

Medicaid OUD patients
into treatment within 7
days of ED discharge.

4

HQIP pathways

Hospital
says “yes”
to all 4,
receives
the
\$193,000
incentive.

PROJECT SIGNIFICANCE

JULY
2016

80% ↑ in

patients visiting PA
EDs for opioid
overdose^[1]

SEPT
2017

“a natural policy
experiment”

PROJECT

AIM

Aim: Compare the measurable characteristics & reasoning of hospitals that decided to agree to all, some, or none of the HQIP pathways.

PROJECT

(Mixed) METHODS

**Aim: Compare the
measurable
characteristics
of hospitals**

= QUANTITATIVE METHODS

Aim: Compare the

reasoning of hospitals

= QUALITATIVE METHODS

QUANTITATIVE METHODS

HQIP Pathways:

All = 77

Some = 44

None = 32

N = 153

Quantitatively compare hospital:

location

size

for- vs non-profit

OUD patients

(AHA Annual Survey)

(Medicaid Claims
Data)

QUALITATIVE METHODS

HQIP Pathways:

All = 8

Some = 7

None = 5

N = 20

Qualitatively compare hospital:

reasons
factors
decisions

(semi-structured
telephone interviews)

with hospital
administrators
+ ED leaders

QUALITATIVE ANALYSIS

Qualitative analysis timeline:

CODEBOOK (RE-)DEVELOPMENT

Analysis: Codebook Design

Code Name	Code Definition
Barriers	Difficulties faced in HQIP implementation.
Facilitators	Factors that helped HQIP implementation.
... + 20 more codes & definitions	

Analysis: interview coding example

Interviewer:

asks **what factors influenced the hospital's decision** to participate in HQIP?

Interviewee:

mentions that the hospital had **implemented similar pathways already** before HQIP. Plus, they had strong **links** with other **community-based MAT resources**. As such, there was a lot of **leadership engagement** to adopt all 4 HQIP pathways and get the **\$193,000** incentive.

Analysis: interview coding example

Interviewer:

what
factors
influenced
decision

Interviewee:

implemented similar
pathways already
links
community-based
MAT resources.
leadership
engagement
\$193,000

FINAL

TAKEAWAYS

Lessons Learned: with Fran Barg & MMRL

Qualitative research is tough!

Mixed Methods: look beyond the numbers.

Interviews: Minimize the “umm.”

Codebook design, get involved!

Code BIG, then go small.

Thank you
