About the SUMR Program
Penn’s Summer Undergraduate Minority Research (SUMR) program began in 2000 as a way to address the current underrepresentation of minorities in fields that inform the direction of health care practice and policy. Through a 12-week summer research internship, mentoring, appropriate role models, and the development of a longitudinal alumni network, the program encourages promising undergraduates to consider careers in fields such as health services research, population health, and clinical epidemiology. By identifying and encouraging undergraduates at a time when they are considering their career options, the program strives to expand the pool of talented individuals who will enter these fields. It is housed in the Leonard Davis Institute of Health Economics (Penn LDI), one of the oldest academic centers for health services research and health policy in the world. LDI is a collaborative venture among all of Penn’s schools, including Penn Medicine, the Wharton School, the Annenberg School, Penn Nursing, the College of Arts and Sciences, and the Children’s Hospital of Philadelphia, from which mentors are recruited.

Learn more here.

SUMR is supported by Penn LDI, the Health Care Management Department of the Wharton School, the Deputy Dean’s Office of the Wharton School, the Wharton Summer Program for Undergraduate Research (SPUR), the Perelman School of Medicine’s Department of Medical Ethics and Health Policy, the Office of Inclusion and Diversity, the Center for Clinical Epidemiology and Biostatistics (CCEB), the Department of Anesthesiology and Critical Care, the Department of Radiology, the Center of Health Economics of Treatment Interventions for Substance Use Disorder, HCV, and HIV (CHERISH), the Center for Health Incentives and Behavioral Economics (CHIBE), the Palliative and Advanced Illness Research (PAIR) Center, the Penn Injury Science Center (PISC), Eli Lilly and Company; the Children’s Hospital of Philadelphia PolicyLab, the VA Center for Health Equity Research and Promotion (CHERP), and the mentors’ research grants.

At the start of SUMR 2021, scholars were asked to consider two questions:

1. Why is health services research important?
2. What are you hoping to get out of your SUMR experience?

The below word cloud represents their responses.
