About SUMR

Penn's Summer Undergraduate Minority Research (SUMR) program began in 2000 as a way to address the current underrepresentation of minorities in fields that inform the direction of health care practice and policy. Through a 12 week summer research internship, mentoring, appropriate role models, and the development of a longitudinal alumni network, the program encourages promising undergraduates to consider careers in fields such as health services research and population health. By identifying and encouraging undergraduates at a time when they are considering their career options, the program strives to expand the pool of talented individuals who will enter these fields. It is housed in the Leonard Davis Institute of Health Economics (LDI), one of the oldest academic centers for health services research and health policy in the world. LDI is a collaborative venture among Penn schools such as Medicine, Wharton, Annenberg, Nursing, and Arts and Sciences and CHOP, from which mentors are recruited.

SUMR is supported by the Leonard Davis Institute of Health Economics and the Health Care Management Department of the Wharton School, the Wharton's Deputy Dean's Office, the VA Center for Health Equity Research and Promotion (CHERP), Center for Improving Care Delivery for the Aging (CICADA), Department of Medical Ethics and Health Policy, Center for Clinical Epidemiology and Biostatistics (CCEB), Department of Anesthesiology and Critical Care, School of Nursing, School of Dentistry and the mentors' research grants.

And a special thank you to all the SUMR mentors listed in the program, the SUMR Selection Committee (Mei-Lynn Hua, Meghan Lane-Fall, Claudio Lucarelli, and Ingrid Nembhard) and the SUMR Advisory Committee (Anita Henderson, Eve Higginbotham, Risa Lavizzo-Mourey, Claudio Lucarelli, Holly Fernandez Lynch, Mark Pauly, and Skip Rosoff) for making the remote version of SUMR a reality.
